

The fully electric **TC1 carrier** is the solution for horizontal transport of long, heavy construction material & equipment at a project site.

The carrier is compact and just 80 cm wide, and material can be placed on it in the length or width. The radio remote controlled carrier is perfect for transporting material, such as steel beams, through small access doors and less easily accessible areas. No more heavy lifting for your personnel.

## Ergonomic, efficient and safe!

### Standard configuration

Capacity	1.200kg
Net weight	500kg
Dimensions (lxwxh)	1450 x 800 x 420mm
Drive	electric 
Power supply	battery pack
Charger	230V 50Hz
Charging time	13 hrs
Ground pressure	0.15kg/cm <sup>2</sup>
Max. speed	2.2km/h
Speed controller	proportional operation
Max. slope angle	25°
Max. tilt angle	20°
Load platform (lxw)	1340 x 730mm
Type platform	swivel

### Accessories/Options

Tracks	non-marking
External power supply	230V
